

Rapid Deployment Remote Monitoring Cart

V3 Integrators Crash Cart provides the capability to quickly and efficiently deploy cameras, wireless communications and teledosimetry. The Crash Cart is ideal for emergent work evolutions or anywhere that video or communications is required.

Our Crash Cart can be customized to the needs of your facility and it can be changed and upgraded as your needs change. A stand-alone solution with no network connectivity or the ability to connect to the network, we can provide a Crash Cart that fits your needs.

The V3i Crash Cart is available in two sizes, the "double stack" shown here and a half-width "single stack" size.

The Basic Configuration shown here can be built on or changed and it includes:

- "Double Stack" Cart 48" W x 29" D x 42" T
- Shock absorbing 8" swivel wheels with brakes and swivel lock pins
- Various high resolution commercial grade monitor packages available
- Smooth upper worksurface
- Full width aluminum slide out work surface
- 15 rack spaces of drawers including a custom 5 RU drawer for camera storage
- Push/Pull handles on both ends
- Simple camera control keypad for most network cameras or Genetec Security Center
- 8 port managed POE+ network switch
- Various robust network cameras and mounts available, PTZ, Fixed or combination
- CAT5 cables with heavy duty Ethercon connectors
- Ability to display video and dosimetry on a single monitor
- External connections for power, cameras and other devices (Ethercon connections for LAN)
